Spintly Joins Z9/FL=X Ecosystem to Add Support for ZKTeco USA Atlas Series Controllers

Seamless integration was possible through the use of Z9 Security's flagship interoperability platform...

April 04th, 2024 - Z9 Security and Spintly have joined forces to integrate ZKTeco USA Atlas Series access control panels into Spintly's cloud-based management software platform. This collaboration signifies a strategic alignment between the global leader in access control interoperability solutions, and Spintly, known for its advanced access control hardware and software solutions. Leveraging Z9 Security's **Z9/FL=X** platform, Spintly software now supports a wider range of access control hardware options for its customers.

NEW EXCITING PARTNERSHIP

Spintly pioneers the world-first BLE Mesh Access Control solution in the realm of smart infrastructure, offering fully wireless access control hardware paired with a cloud-based software platform. Spintly brings simplicity and scalability to it's users. Catering to a large range of industry segments, the innovative offerings include a range of software solutions like time and attendance systems, wireless access control for businesses of all sizes, intercom solutions, and contactless visitor management. Spintly's versatile readers, support a multitude of credentials, including NFC cards, fingerprints, and smartphones.

By combining their expertise, Z9 Security and Spintly aim to deliver a seamless and comprehensive access control solution that prioritizes both convenience and security. Spintly's reputation for innovative security systems complements ZKTeco USA's Atlas Series controllers, which are already **z9/op=n** certified.

"Spintly's dedication to user-friendly, secure solutions is evident in this partnership, as we aim to enhance the market with innovative offerings, " said Rohin Parkar, Co-Founder & CEO of Spintly. "This collaboration will result in more powerful security solutions tailored to evolving customer needs. This integration in particular provides customers with a compelling solution that encompasses both wireless and wired access with the same credentials, which is critical for most modern deployments."

Z9/FL=X is the industry's most flexible, powerful, cloud-enabled access control service, supporting a wide variety of open and proprietary hardware. The Atlas Series hardware with the Spintly management platform was made possible through the elegant **Z9/FL=X** unified data model and Application Programming Interface (API). By using **Z9/FL=X**, Spintly vastly lowered their development costs and accelerated the time-to-market to fully support the Atlas Series integration. With this integration, Spintly is now a member company of the Z9 Security ecosystem, which offers benefits such as being able to easily support additional best-of-breed access control hardware platforms.

Ken Larson, President of Z9 Security, expressed excitement about expanding Spintly's hardware options through this collaboration. "The power of open architecture continues to grow as we enable scalable and powerful security solutions like Spintly," said Larson. "This partnership exemplifies the benefits of seamlessly and swiftly integrating into a thriving and expanding interoperability ecosystem."

About Spintly:

Spintly is a technology company specializing in smart access control solutions for smart buildings. Their systems utilize innovative technology, including Bluetooth Low Energy (BLE) and cloud-based platforms, to provide secure, scalable, and convenient access management for commercial and residential properties. Spintly's solutions often involve smartphone-based access control, enabling users to unlock doors and manage access permissions remotely through dedicated mobile applications. Furthermore, the Spintly wireless solution makes for a hassle free and cost effective installation. Saving time on labor and material costs. For more information, visit https://spintly.com/us/.

About Z9 Security:

Z9 Security is the creator of the access control industry's first and only true hardware and software interoperability ecosystem. This ecosystem features the **Z9/FL=X** cloud-based service, and **z9/op=n** technology platform for hardware, seamlessly integrating a wide range of both open and proprietary access control hardware and software, redefining interoperability, and drastically reducing time and cost to introduce new integrations. The Z9 Security ecosystem currently enables hundreds of hardware and software interoperability combinations, and is growing fast. The Z9 Security team is made up of industry veterans with decades of expertise in access control, who have been behind the success of some of the biggest names in the industry.
